Tags: [kayou](#) [kayoumini](#)

This page is a **Wiki** regrouping all the necessary informations about **3D Printable TPU Files for the Kayoumini 2.5"**. All of the .stl files are available in the "Files" tab.

Kayoumini 2.5" Starter Pack - All you need to know

Recommended electronics, Betaflight presets, component placement etc, **you'll find everything you need to build your quad around your Kayou Frame** on the **Kayoumini 2.5" Starter Pack !**

For any specific request/question, **feel free to contact us directly on Kayou Frames Discord Server**

9/8/2020

Standoff options

The frame kit includes 2 standoff options : 8 and 12mm.

The goal is to **keep your build as lightweight and compact as possible** wether you fly **Analog or Digital**.

Camera prints are **12mm high for digital**, and **8mm high for Analog** by default.

Camera mounts - an infinite range of possibilities !

The front end is **completely modular** allowing for a **tight, precise** and **optimized fit whatever your setup is**.

14mm is the standard camera size for this form factor, **a large collection of print is available** for the most used cameras on the market. **Print the mount that fits your exact camera model and tilt and fly it !**

We obviously couldn't design straightaway prints for every single camera on the market and for every imaginable tilt, so feel free to [contact us on discord](#) if you need any specific file.

Building

Unsure about **how to mount your components** or **how to run your cables** ? Have a look at these few shots of **example builds** :

Analog build based on a Happymodel X12 AIO and a Runcam Nano 3.

Digital build based on the DJI O4 (Lite)

Development Kit

Step files of various prints are available in the Development Kit folder allowing pilots with **experience in CAD softwares** to design your own mounts !

Sharing custom prints through printables or thingiverse **is much appreciated**, that's how we **improved the TPU kits** of all of the existing frames over time and we're very thankful to the community for it.
